Summary

Full Stack Software Engineer with experience building scalable web applications using Next.js, TypeScript, Node.js, Express.js, PostgreSQL, and modern web technologies. Skilled in authentication systems, REST APIs, frontend architecture, and full-stack application development.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Python, C++, SQL, Java,
- **Frontend:** React.js, Next.js, TanStack Query, Zustand, Redux Toolkit, Tailwind CSS, Material UI, shadcn/ui, HTML, CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Zod
- **Databases:** PostgreSQL, MongoDB, MySQL, Prisma ORM
- **Cloud & Tools & Platforms:** Docker, Amazon EC2, Git, GitHub, Postman
- **AI & Integrations:** OpenAI GPT, OpenAI Whisper

Work Experience

Software Developer

LDT Technology, Zirakpur (On-Site) | July 2025 – Present

- Contributed to multiple production applications across the company's portfolio, including a School Management System, Loan Management System, and other client modules, working in cross-functional teams with backend engineers, QA, and product owners.
- Worked on Escrowia, a production-grade escrow platform supporting KYC/KYB onboarding, contract creation, and contract lifecycle management.
- Architected the Escrowia frontend from scratch — including project structure, API integration layers, authentication, route protection, and reusable component systems — using Next.js, TypeScript, TanStack Query, Zustand, and Tailwind CSS.
- Developed multi-step onboarding and document workflows with draft persistence, validation, and complex state transitions using React Hook Form and Zod.
- Implemented contract lifecycle features including approvals, amendments, disputes, and status-based transitions, integrating 20+ REST APIs.
- Collaborated on backend solution design for third-party API integrations involving transactions, webhooks, and external data sync workflows.
- Performed PR reviews, code merges, and Docker-based deployments on EC2 while mentoring junior interns.

Software Development Intern

Helios Tech Labs, Mohali (On-Site) | Dec 2024 – July 2025

- Collaborated with a team to build custom workflow tools and interactive widgets using Node.js and React.js.
- Developed a voice-activated ticketing system with React.js and Express.js, integrating OpenAI Whisper and GPT to cut manual effort by ~70%.
- Engineered a **batch-processing** pipeline in Node.js to ingest Excel exports from a legacy RC system, automating updates for 100+ project entries with rate-limit handling.
- Leveraged Postman, GitHub, and internal API docs for seamless integration testing and version control.
- Delivered fully functional modules aligned with client needs for production deployment.

Full Stack Developer Intern

Cognito Technologies, Kolkata (Remote) | August 2024 – Sept 2024

- Led end-to-end development of a GPT-powered onboarding flow with React.js and Redux, boosting user personalization and cutting manual screening time by ~60%.
- Developed and tested APIs in Python and Azure Functions, supporting secure interaction with CosmosDB.
- Built responsive front-end interfaces in React.js and Redux, ensuring a scalable and maintainable architecture.

Projects

Scribe

Tech-stack: Node.js | Express.js | TypeScript | PostgreSQL | Prisma

Link: <https://github.com/simran1729/scribe>

Description:

- Architected and developed a developer-focused publishing platform enabling users to create, manage, and share technical articles and knowledge resources.
- Built a developer-focused publishing platform with **JWT** authentication, refresh tokens, email verification, and RBAC.
- Designed PostgreSQL schemas supporting blogs, comments, likes, followers, tags, and user **activity tracking**.
- Implemented nested comments, follow/following systems, and content engagement features using Prisma ORM.
- Designed the backend as a modular monolith with Zod validation and structured logging using Pino.
- Implementing feed generation and cursor-based pagination to support scalable content discovery and user engagement workflows.

Escrowia

Tech-stack: Next.js | TypeScript | TansStack Query| Zustand | React Hook Form | Zod | shadcn/ui | TansStack Table

Link: <https://dev-app.escrowia.ae/>

Description:

- Architected the frontend from scratch, implementing authentication, protected routes, API integration layers, state management, and reusable UI systems.
- Developed multi-step onboarding workflows with document uploads, draft persistence, progress tracking, and validation using React Hook Form and Zod.
- Implemented contract workflows including amendments, disputes, and status-based transitions while integrating 20+ REST APIs.
- Built a production-grade escrow platform supporting KYC/KYB onboarding, contract creation, and contract lifecycle management.

Education:

BTech CSE (Lyallpur Khalsa College Technical Campus, Jalandhar) | July 2021- July 2025 | **CGPA: 8.29/10**

Relevant Coursework: Data Structure & Algorithms, Operating Systems, Computer Architecture, Python, C++, DBMS, Computer Networks, Finite Automata, Machine Learning, Artificial Intelligence
